**I had no special training at all;
I am completely self taught.**

**I don't fit the mold of a visual arts designer or
a graphic designer.**

**I just had a strong concept about what a game
designer is.**

**Someone who designs projects to make
people happy.**

That's a game designer's purpose.

What Do You Think?

Ownership is tough when there's a failure. But as a field leader, knowing every detail of the job and being responsible for the execution of those details means your team will have the best chance of success. You have been listening to conversations and learning about the leadership traits that are most important to your team's success. Those traits are character, attitude, and ownership.

Your next task is to take a self-assessment of these traits and their supporting attributes. Be honest with yourself as you take the assessment. Pay attention to the areas you need to work on and make a mental note to be aware of these weaknesses as you lead your team.
