

## Mouse Tutorial

A computer mouse is a handheld device used to interact with objects on a screen. This tutorial explains how to hold, use, and perform various tasks with a mouse.

### Holding the Mouse

*Proper hand positioning ensures comfort and efficiency:*

- Thumb rests on the left side.
- Index finger on the left button.
- Middle finger on the right button.
- Palm cups the mouse lightly.

The Mouse

### Using the Mouse

- **Clicking:** Press and release the left button to interact with objects.
- **Rollover:** Hovering over icons changes their appearance to indicate interactivity.
- **Double Clicking:** Quickly press the left button twice to open files or programs.
- **Drag and Drop:** Click and hold an object to move it to a new location. Useful for organizing files.
